Keysight Technologies
Test Data Management

Data Sheet

PS-X10-100

– Make test data available to your customers on-line

Service Description

Keysight Technologies, Inc. Test Data Management service offers structured and organized storage of test data and test results. This provides easy access for further analysis and reporting. Analysis includes raw measurement data, database design, and development of relevant reports that describe your process.

Service Scope

A qualified Keysight test automation expert will deliver this service at your site. Tasks include:
– Meeting with your team to determine data storage requirements
– Design and creation of the database
– Integrating database storage routines into existing test software
– Converting and moving existing data into the database
– Setting up tools to access and analyze the data
– Generating reports showing process trends

This service will be customized to the scope and timing your process requires.

Business Need

– Understand test environment and capabilities
– Improve efficiency
– Increase productivity

What You Will Receive

– The services of a Keysight technical consultant experienced with test automation
– A working, customized database
– Tools to access and analyze the data
– Documentation of the database structure
– Pre-defined reports

Required From Customer

– Data collection requirements
– Database server computer with printer
– Network access
– IT support
– Raw measurement data
– Output report requirements
