M9300A

PXIe Frequency Reference

Data Sheet

Overview

Product Description

The Keysight Technologies, Inc. M9300A PXIe frequency reference is a PXIe compatible compact modular instrument that can be used as a 10 MHz or 100 MHz reference in various solutions. A single M9300A can be shared with up to four M9381A VSGs, as shown in Figure 1, or five M9380A CW sources to form a multi-channel solution in one compact chassis. It can also be used to generate a clean 100 MHz clock in wideband 2 and 4 channel hardware configurations, as shown in Figure 2.

Instrument control is provided through a soft front panel and programmatic interfaces tuned to your application development environment of choice.

Product Features

- Locks to another reference with a value from 1 to 110 MHz.
- Five 100 MHz outputs
- One 10 MHz output
- Internal 10 MHz OCXO timebase output

Uncompromising Values

- Reduces development time and simplifies integration into existing test environments with multiple drivers and programmatic interfaces.
- Reduces startup time with Keysight IO libraries easy con-figuration, one-step software install, and soft front panel.
- Fast repair turnaround time with Calibrated Core Exchange strategy.

Technical Specifications and Characteristics

Definitions for specifications

Temperatures referred to in this document are defined as follows:

- Operating ambient temperature = 0 to 55 °C and individual module temperature of ≤ 75 °C
- Room temperature = 20 to 30 °C and individual module temperature of ≤ 55 °C

Specifications describe the warranted performance of calibrated instruments. Data represented in this document are specifications unless otherwise noted.

Specifications are warranted under the following conditions:

- Calibrated instruments that have been stored for a minimum of 2 hours within the operating ambient temperature range
- 30 minute warm-up time
- Calibration cycle maintained

Characteristics describe product performance that is useful in the application of the product, but that is not covered by the product warranty. Characteristics are often referred to as Typical or Nominal values and are italicized.

- **Typical** describes characteristic performance, which 80% of instruments will meet when operated at room temperature.
- **Nominal** describes representative performance that is useful in the application of the product when operated at room temperature.

Note: All graphs contain measured data from several units at room temperature unless otherwise noted.

Recommended best practices in use

- Use slot blockers and EMC filler panels in empty module slots to ensure proper operating temperatures.
- Keysight chassis and slot blockers optimize module temperature performance and reliability of test.
- At operating ambient temperatures above 45 °C, chassis fan should be set to high.

Frequency stability - Aging rate

Daily $< \pm .5$ ppb/day, after 72 hour warm-up
 Yearly $< \pm .10$ ppm/year, after 72 hours warm-up
 Total 10 years $< \pm 0.6$ ppm/10yrs, after 72 hours warm-up

Achievable initial calibration accuracy (at time of shipment) $\pm 5 \times 10^{-8}$

Frequency stability - Temperature effects

20 to 30 °C $< \pm 10$ ppb
 Full temperature range $< \pm 50$ ppb

Frequency stability - warm up

5 minutes over +20 to +30 °C, with respect to 1 hour $< \pm 0.1$ ppm
 15 minutes over +20 to +30 °C, with respect to 1 hour $< \pm 0.01$ ppm

External reference input

Frequency 1 MHz to 110 MHz, sine wave
 Lock range ± 1 ppm, nominal
 Amplitude 0 to 10 dBm, nominal
 Connector 1 SMB snap-on
 Impedance 50 Ω , nominal

1. Samples of this product have been type tested in accordance with the Keysight Environmental Test Manual and verified to be robust against the environmental stresses of Storage, Transportation and End-use; those stresses include but are not limited to temperature, humidity, shock, vibration, altitude and power line conditions. Test Methods are aligned with IEC 60068-2 and levels are similar to MIL-PRF-28800F Class 3.
2. Because of the installation procedure, less memory may be required for operation than is required for installation.
3. .NET framework runtime components are installed by default with Windows 7 and Windows Vista. Therefore, you may not need this amount of available disk space.

Software

Instrument connection software

Keysight IO
Library

The Suite offers a single entry point for connection to the most common instruments including AXIe, PXI, GPIB, USB, Ethernet/LAN, RS-232, and VXI test instruments from Keysight and other vendors. It automatically discovers interfaces, chassis, and instruments. The graphical user interface allows you to search for, verify and update IVI instrument and soft front panel drivers for modular and traditional instruments. The Suite safely installs in side-by-side mode with NI I/O software.

Calibration and traceability

Factory Calibration	The M9300A Frequency Reference ships factory calibrated with an ISO-9002, NIST-traceable calibration certificate.	Included in base configuration
Calibration Cycle	A one year calibration cycle is recommended	
Calibration Sites	<ul style="list-style-type: none"> – At Keysight's 35 Worldwide Service Centers – On-site by Keysight – By self-maintainers 	More information visit www.keysight.com/find/infoline
R1282A Annual Calibration Service	<ul style="list-style-type: none"> – Keysight Calibration – Keysight Calibration + Uncertainties – Keysight Calibration + Uncertainties + Guardbanding – Standards Compliance – ANSI Z540.3-2006, ISO 17025:2005, ANSI Z540-1-1994, ISO 9001:2008 	Additional service, not included in the warranty
N7800A Calibration and Adjustment Software	The M9300A Frequency Reference is supported by Keysight's Calibration and Adjustment Software. This is the same software used at Keysight Service Centers to automate calibration. The software offers compliance tests for ISO 17025:2005, ANSI/NCSL Z540.3-2006, and measurement uncertainty per ISO Guide to Expression of Measurement Uncertainty.	Licensed software. For more information, visit www.keysight.com/find/calibrationsoftware
Keysight Calibration Status Utility	The Keysight Calibration Status utility helps ensure your M9300A is calibrated by managing the calibration interval and providing messages regarding instrument and module calibration status.	Included in base configuration

Support and Warranty

Warranty		
Global warranty	Keysight's warranty service provides standard coverage for the country where product is used. <ul style="list-style-type: none"> – All parts and labor necessary to return to full specified performance – Recalibration for products supplied originally with a calibration certificate – Return shipment 	Included
Standard	3-year warranty (return to Keysight) 15 days typical turnaround repair service	Included
R-51B-001-5Z	5-year return to Keysight warranty assurance plan 15 days typical turnaround repair service	Optional
R-51B-001-3X Express Warranty 3 years	The express warranty upgrades the global warranty to provide, for 3 years, a 5 day typical turnaround repair service in the US, Japan, China and many EU countries.	Optional
R-51B-001-5X Express Warranty 5 years	The express warranty upgrades the global warranty to provide, for 5 years, a 5 day typical turnaround repair service in the US, Japan, China and many EU countries.	Optional
Support		
Core Exchange Program	Keysight's Replacement Core Exchange program allows fast and easy module repairs. A replacement core assembly is a fully functioning pre-calibrated module replacement that is updated with the defective module serial number, allowing the replacement module to retain the original serial number.	For qualified self-maintainers in US only
Self-Test Utility	A self-test utility runs a set of internal tests which verifies the health of the modules and reports their status.	Included in base configuration
