

Keysight Single Source Solution Plans

Manage 100% of your instrument service requirements regardless of instrument brand

Keysight simplifies management of calibration and repair service for all your test equipment.

Multi-vendor inventories are common in most industries and company labs today. Developing products in a fast moving environment requires a complex instrument plan to match. To ensure they operate at optimum efficiency, Keysight Technologies, Inc. single source solutions will manage your complex multi-vendor environment business by:

- Easy management simplification through one contract
- Consistent quality delivered worldwide
- Reduced operating costs
- Accountability for calibration management
- Access to a global network with local engineers
- Online Instrument Management tools which provides complex information for your equipment

Keysight manages 100% of single source solutions for your business by understanding technically how to support high-end products in a multivendor environment, providing the correct test procedures and documentation. If we can't do it, we'll tell you!

	Third-party	Keysight
Thoroughness Based on available procedures, Keysight measures the actual performance of your Keysight instruments for every specification and every option—every time		
Accurate measurements Our measurement procedures and equipment ensure high accuracy (or “low uncertainty” in metrology terminology). There’s no point in measuring instrument performance unless the measurements are accurate!		
Scope of Accreditation (Keysight.com/find/accreditation) Keysight measurements are covered by the published scope of accreditation. This proves an accreditation body assessor has reviewed and approved our measurement uncertainties.		
Adjustments If your instrument is out-of-tolerance (OOT) when measured, we will perform available non- Keysight manufacturer-specified adjustments and then retest.		
Turnaround time (TAT) Many third-party providers send OOT instruments to us for repair when only adjustments are needed. This can turn into delays—often twice the quoted TAT—and extra cost for you.		

Single-source solutions: Instrument calibration and repair

Keysight will increase instrument utilization and lower cost of ownership by developing a custom repair and calibration solution for your facility. We have developed testing for non-Keysight devices with documentation and automation.

Our experience and resources in the test and measurement business provide us the knowledge and skill through like instruments to build these procedures.

Keysight custom delivery solutions maximize uptime and minimize management costs:

	Service center	Volume on-site calibration	On-site system uptime	Resident professional
Total cost of ownership elements	Send your instruments to Keysight for predictable fast service and expert restoration to full functionality	Maximize uptime by bringing the same Keysight equipment and processes used at Keysight Service Centers to your site	Keep your systems, such as ParBerts and antenna test systems, up and running without ever moving them	Keep your equipment operating almost non-stop with an Keysight professional assigned to your site
Technology roadmap sharing for CapEx planning				•
CapEx optimization for procurement and utilization			•	•
Maximize system availability			•	•
Dedicated on-site Keysight engineers		•	•	•
Metrology standards and audit compliance	•	•	•	•
Instrument tracking	•	•	•	•
Logistics management	•	•	•	•
Keysight calibration and/or repair service	•	•	•	•
