

Keysight Technologies

Extended Support Life Services

Per-incident service for select Keysight products beyond the end-of-support date

For many companies, supporting obsolete equipment is a challenge, often impacting how they are measured

- Turnaround time
- Productivity/output
- Uptime/availability
- Cost pressures

Don't compromise on an alternative vendor who can increase your risk by:

- Cutting corners on parameters tested and/or the number of test points
- Using inadequate calibration standards or calibration software that does not comply with OEM specifications
- Lacking rigor in their quality control

Keysight Technologies, Inc. knowledge and expertise provides three key benefits when it comes to per-incident services on products beyond their end-of-support date

- Minimize downtime
- Greater convenience
- Increased confidence

Minimize downtime

Rely on highly trained technicians with automated calibration procedures to get your instrument repaired and calibrated right the first time, increasing uptime and productivity.

Greater convenience

One trusted vendor responsible for repair and calibration. In addition to the parts and labor necessary to return an instrument to full specified performance, each repair includes a full calibration with required adjustments, calibration report and certification.

Increased confidence

Only Keysight can insure that your product is repaired and calibrated effectively... as we measure the actual performance of every warranted specification, for every installed option, every time.
