The Keysight Technologies, Inc. next-generation oscilloscopes offer waveform update rates 20 times faster than any other oscilloscope in this class. With the latest capacitive touch screen technology and innovative InfiniiScan Zone touch triggering, your oscilloscope experience will be completely redefined.

## Experience the speed

Find even more of your most intermittent signal anomalies

- Industry's fastest 1,000,000 waveforms/sec update rate
- Uncompromised MegaZoom IV smart memory
- Standard segmented memory

## Experience the usability

Quickly debug your design with an oscilloscope designed for touch

- Industry's largest 12.1-inch display
- Industry's first capacitive touch screen
- Exclusive InfiniiScan Zone touch triggering

## Experience the integration

Get the power of 5 instruments in 1, fully upgradable

- Best-in-class oscilloscope
- 16 digital channels on MSO models and upgrade
- Hardware-based serial protocol analyzer (optional)
- Industry-exclusive WaveGen dual-channel function/arbitrary waveform generator (optional)
- 3-digit voltmeter (optional)

Patented MegaZoom IV smart memory gives you more confidence in your design with uncompromised responsiveness, even with MSO, serial protocol decode, math functions and measurements turned on

Industry's first capacitive touch screen dramatically speeds setup and operation for unprecedented usability in an embedded OS scope.

Industry's largest display of 12.1 inches gives you more visibility.

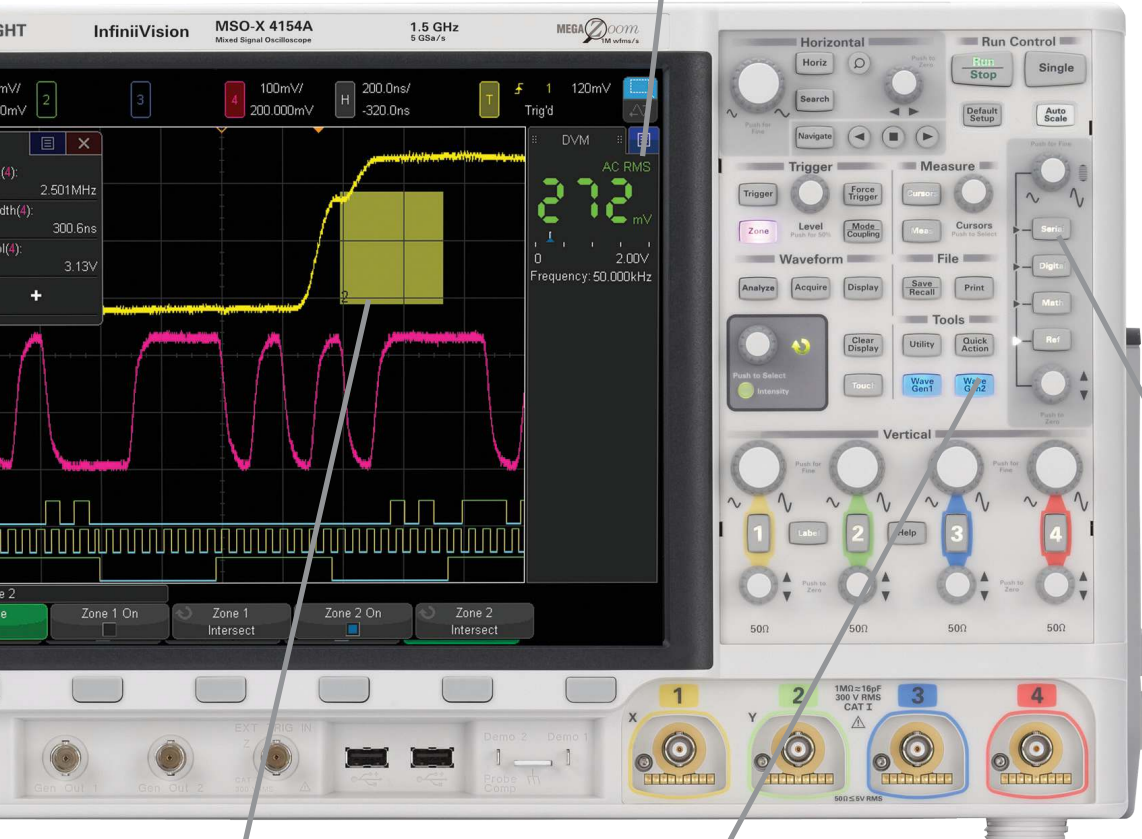

The industry-leading 1,000,000 wfms/sec update rate lets you troubleshoot problems by showing you more signal detail than any other scope in this class.

The industry's only integrated 3-digit voltmeter provides DVM capabilities via the scope probes.

Standard segmented memory intelligently utilizes the acquisition memory to capture just the signal of interest to you, resulting in an effective ultra-deep memory oscilloscope.

The mask testing option tests devices to your parameters at 270,000 tests per second.

Take advantage of the largest set of application solutions in the industry including serial bus triggering and decode support.

InfiniiScan Zone touch triggering accomplishes advanced triggering with ease. If you can see it, you can trigger on it by simply drawing a box on screen.

Industry's only integrated dual-channel WaveGen 20 MHz function/arbitrary waveform generator lets you simulate a variety of function and arbitrary waveforms including differential signals, clock and data signals, modulations and more in a single instrument.
