## AvionTEq

Test with full trust

## www.avionteq.com

Before loading the following application, you must setup a connection to the ATC601. An example of this setup for Tera Term can be found in the "teraterm setup.doc" document.

## Setup for Tera Term...

- 1. Setup->Serial Port...
- 2. Serial Port to desired port.
- 3. Set Baud rate to "38400".
- 4. Set Data to "8 bit".
- 5. Set Parity to "none".
- 6. Set stop bit to "1 bit".
- 7. Set flow control to "hardware".

## Application load procedure...

- 1. Connect unit to pc via rs232 cable (IFR Stock #63043).
- 2. Start unit. Type "C" before the unit loads. The following should be displayed.

🛄 Tera Term - COM1 VT
