\*See Parts List for serial number ranges.

### WAVEFORM CONDITIONS

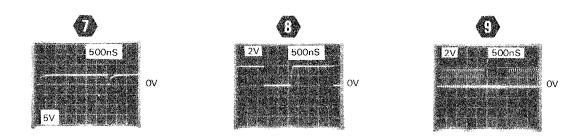

The waveforms shown were taken with the 7854 controls set as follows: CRT DISPLAY (SCOPE); TRIGGER SOURCE (VERT MODE); VERTICAL MODE (LEFT); HORIZONTAL MODE (B); READOUT INTENSITY (MIDRANGE).

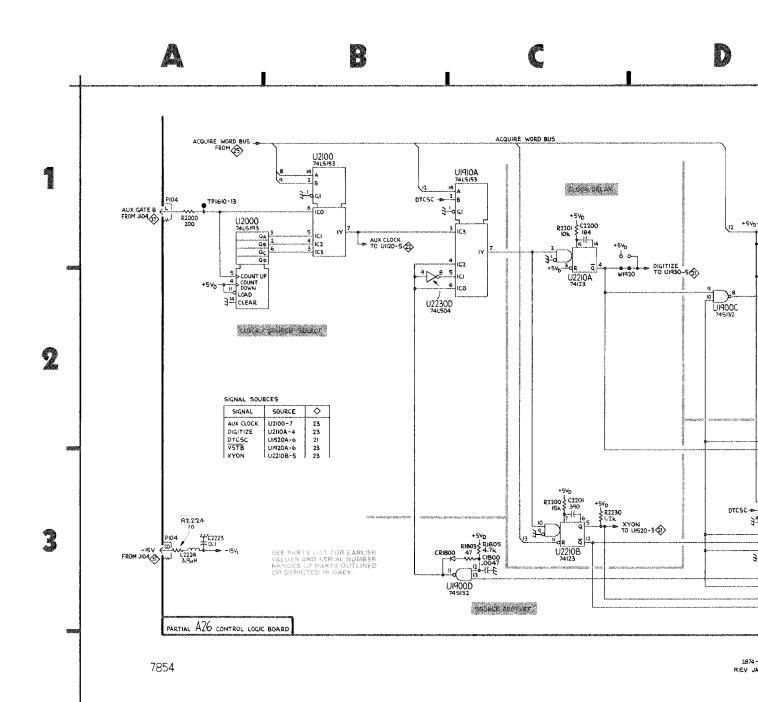

Waveform Conditions. The waveforms shown below were obtained using a test oscilloscope system with 10 M $\Omega$  input impedance, at least 60 MHz bandwidth and 10X probe (Tektronix 7603 Oscilloscope, 7B92 Time Base, 7A13 Differential Comparator and P6063A Probe).

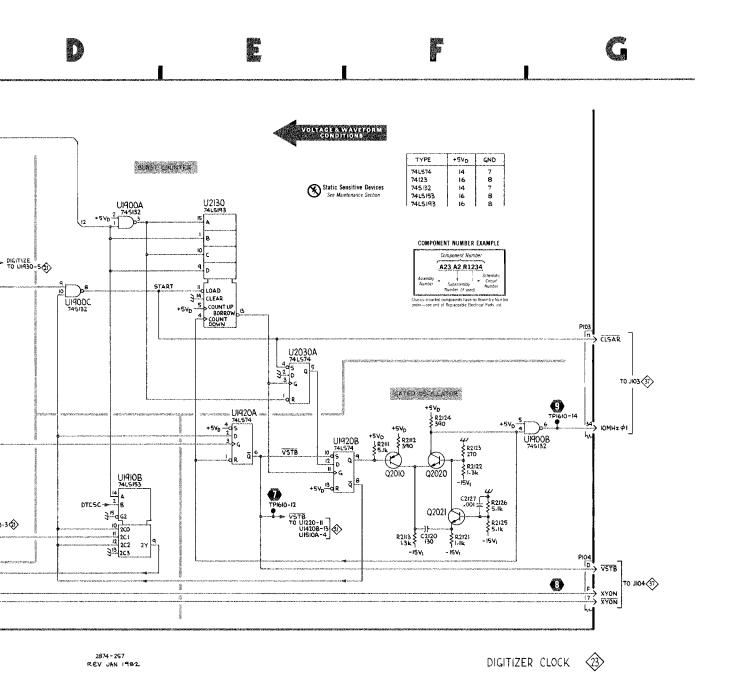

A Tektronix 7A26 Dual Trace Amplifier with controls set as follows: VOLTS/DIV (0.1 V); DISPLAY MODE (CH1); was installed in the LEFT VERT compartment of the 7854.

The 0.4 V CALIBRATOR signal was applied to the channel 1 bnc connector.

A Tektronix 7B15 Time Base with controls set as follows: TRIGGERING (NORM, AC, INT); TIME/DIV (1 ms); was installed in the B HORIZ compartment of the 7854.

### WAVEFORM CONDITIONS

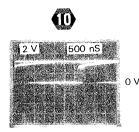

The waveforms shown were taken with the 7854 controls set as follows: CRT DISPLAY (SCOPE); TRIGGER SOURCE (VERT MODE); VERTICAL MODE (LEFT); HORIZONTAL MODE (B); READOUT INTENSITY (MIDRANGE).

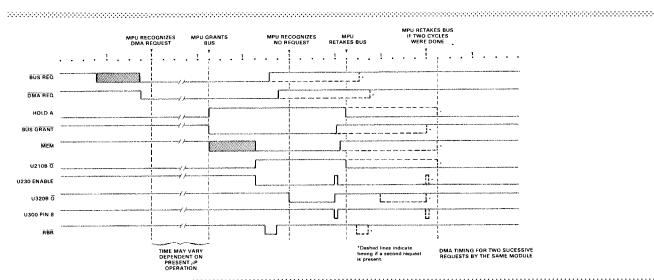

Waveform Conditions. The waveforms shown below were obtained using a test oscilloscope system with 10 MΩ input impedance, at least 60 MHz bandwidth and 10X probe (Tektronix 7603 Oscilloscope, 7B92 Time Base, 7A13 Differential Comparator and P6063A Probe).

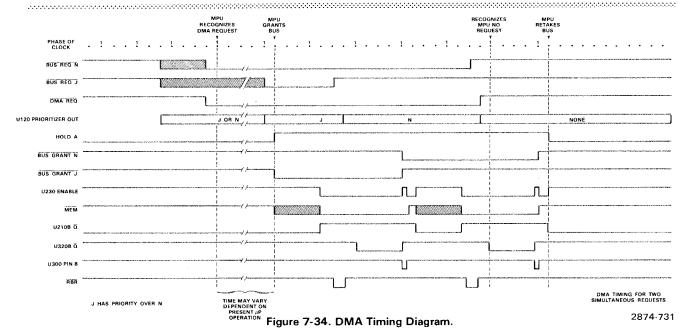

A Tektronix 7A26 Dual Trace Amplifier with controls set as follows: VOLTS/DIV (0.1 V); DISPLAY MODE (CH1); was installed in the LEFT VERT compartment of the 7854.

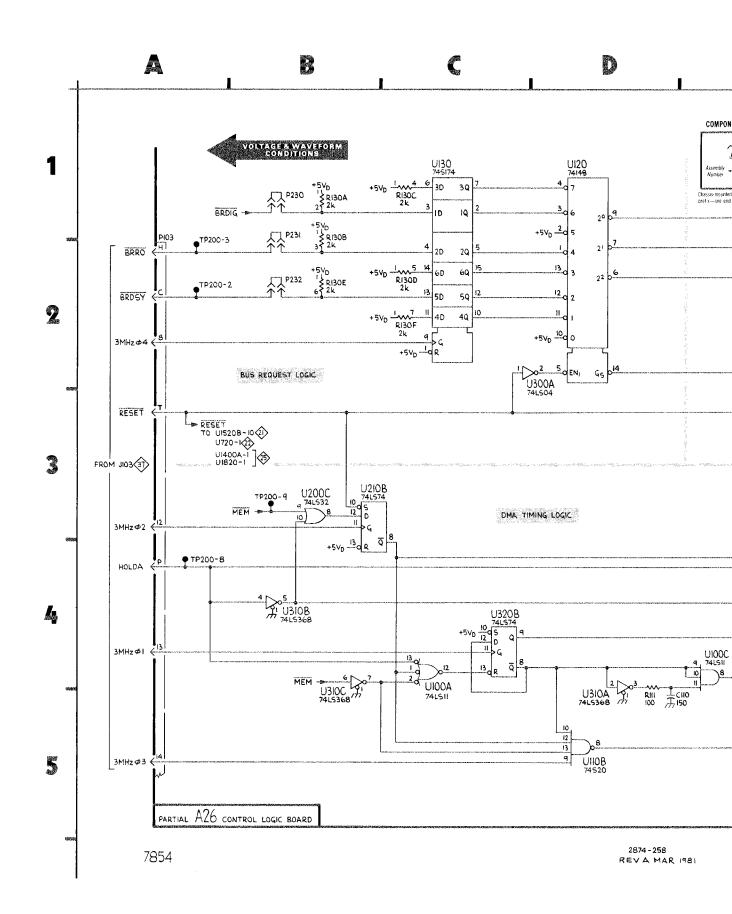

The 0.4 V CALIBRATOR signal was applied to the channel 1 bnc connector.

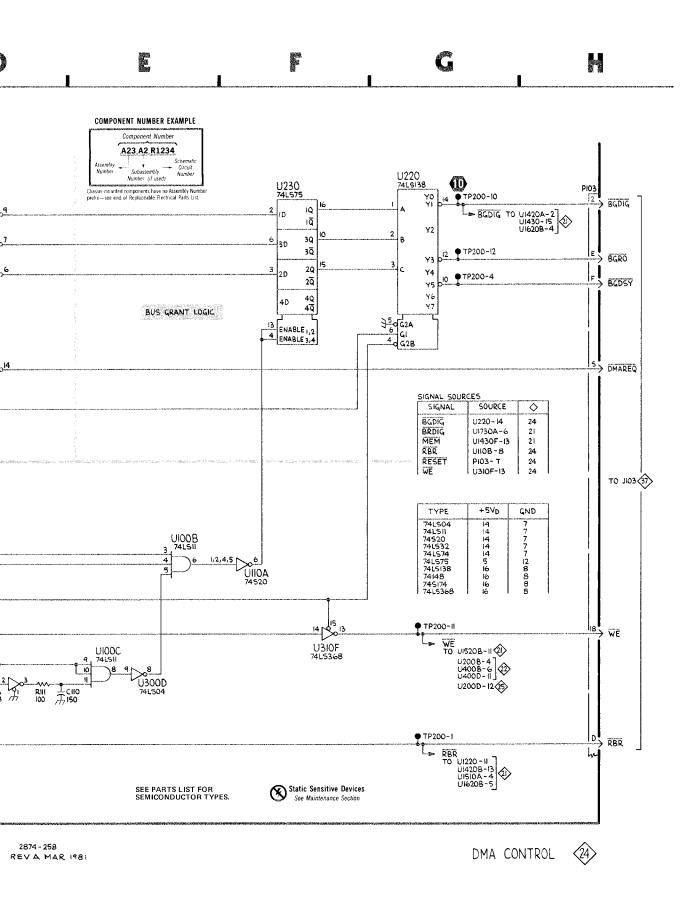

A Tektronix 7B15 Time Base with controls set as follows: TRIGGERING (NORM, AC, INT); TIME/DIV (500  $\mu$ s); was installed in the B HORIZ compartment of the 7854.

# **DIGITIZER DIAGRAM 26**

#### WAVEFORM CONDITIONS

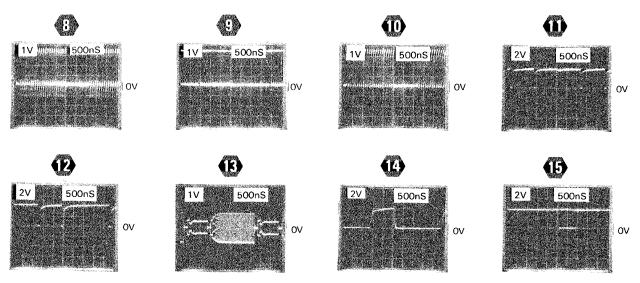

The waveforms shown were taken with the 7854 controls set as follows: CRT DISPLAY (SCOPE); TRIGGER SOURCE (VERT MODE); VERTICAL MODE (LEFT); HORIZONTAL MODE (B); READOUT INTENSITY (MIDRANGE).

Waveform Conditions. The waveforms shown below were obtained using a test oscilloscope system with 10 M $\Omega$  input impedance, at least 60 MHz bandwidth and 10X probe (Tektronix 7603 Oscilloscope, 7B92 Time Base, 7A13 Differential Comparator and P6063A Probe).

A Tektronix 7A26 Dual Trace Amplifier with controls set as follows: VOLTS/DIV (0.1 V); DISPLAY MODE (CH1); was installed in the LEFT VERT compartment of the 7854.

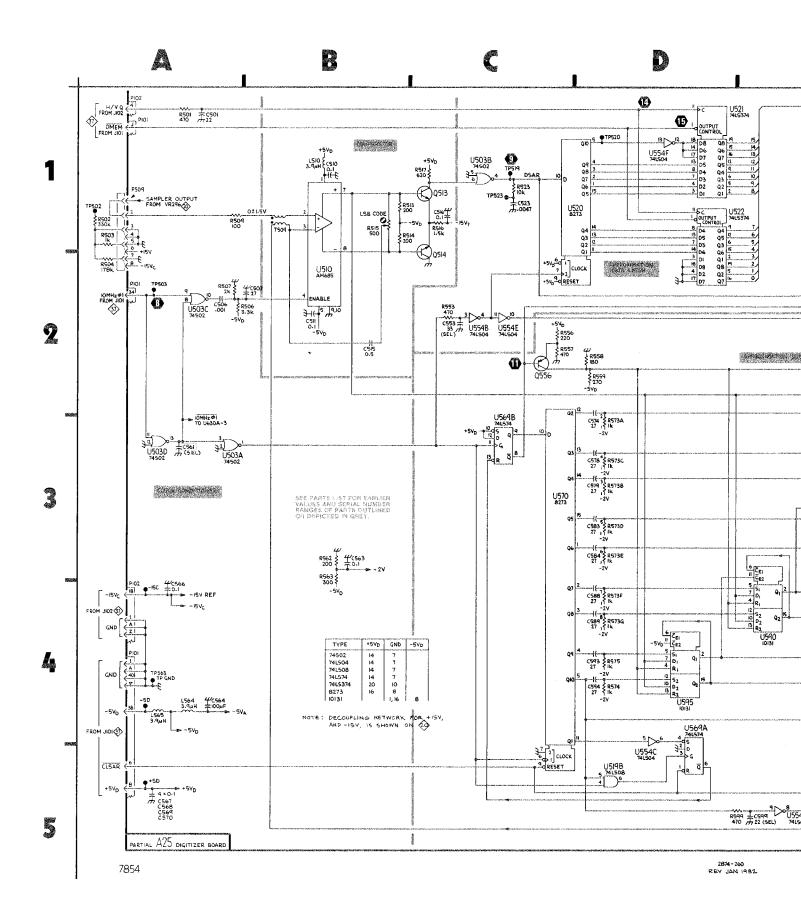

The 0.4 V CALIBRATOR signal was applied to the channel 1 bnc connector.

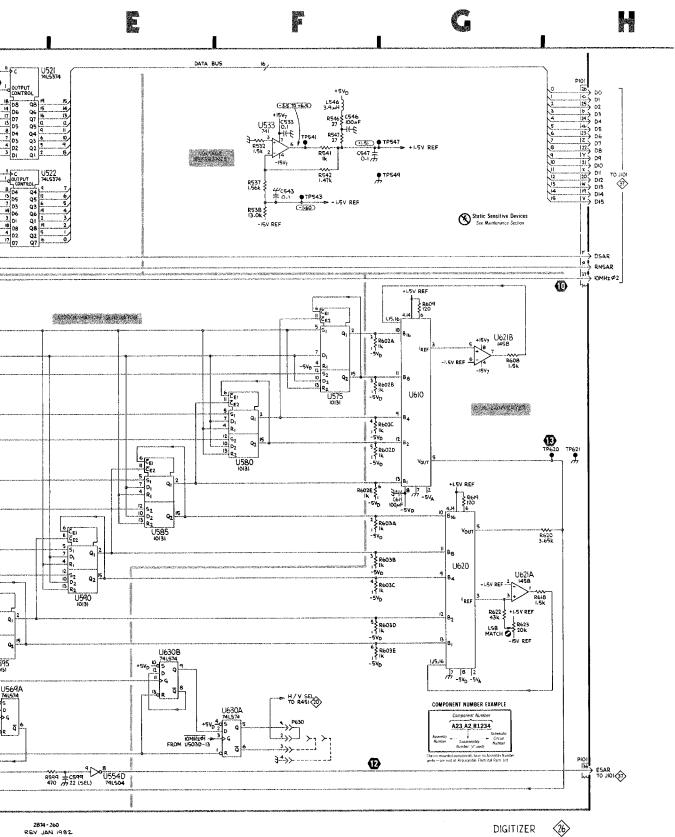

A Tektronix 7B15 Time Base with controls set as follows: TRIGGERING (NORM, AC, INT); TIME/DIV (1 ms); was installed in the B HORIZ compartment of the 7854.

### Selectable Electrical Parts Table For Schematic 26.

| Component Number | Reason for Selection                                                                                                                      | Component Value              |
|------------------|-------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|
| A25C553          | Falling edge of last clock should be<br>20-30ns later than rising edge of<br>pulse at TP519. (Select C553 first<br>to avoid interaction). | 33pF<br>27pF<br>40pF<br>47pF |
| A25C561          | Increase C561 until R515 has proper range.                                                                                                | 33-62pF                      |
| A25C599          | Rising edge at pin 36 of P101 should<br>be 5-15ns later than rising edge<br>at TP520.                                                     | 15рF<br>27рF<br>ЗЗрF         |

# RANDOM ACCESS MEMORY DIAGRAM 30

#### VOLTAGE CONDITIONS

The voltages were taken with the 7854 controls set as follows: CRT DISPLAY (SCOPE); TRIGGER SOURCE (VERT MODE); VERTICAL MODE (LEFT); HORIZONTAL MODE (B); READOUT INTENSITY (OFF).

Voltage Conditions. The voltages on the diagram were taken using a digital multimeter with a 10 M $\Omega$  input impedance (Tektronix DM 501 Digital Multimeter installed in a TM 501 Power Module or a Tektronix 7D13 Digital Multimeter used with a readout-equipped 7000-Series Oscilloscope).

ure 7-42. Character Mode Timing Diagram.

#### **REV A MAR 1981**

#### WAVEFORM CONDITIONS

The waveforms shown were obtained with the 7854 controls set as follows: CRT DISPLAY (STORED): VERTICAL MODE (LEFT); HORIZONTAL MODE (B): READOUT (OFF, for Y-T Mode and X-Y Mode ON, for Character Mode).

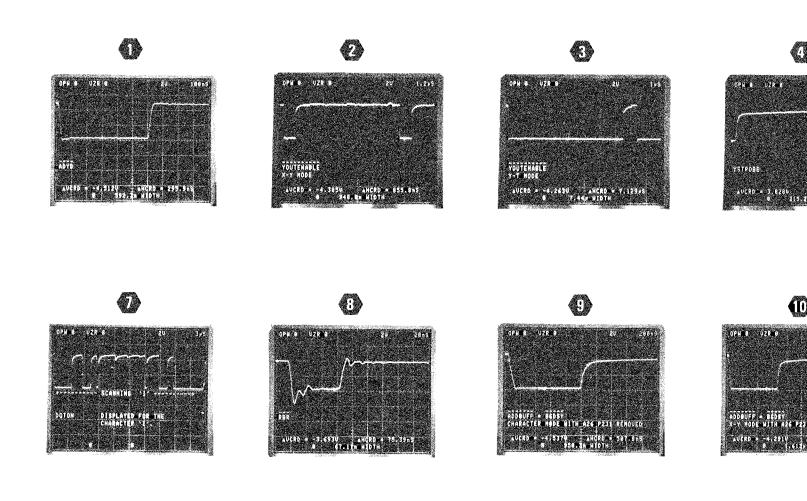

Refer to the waveform photos for additional setup information. No plug-in units were installed in the 7854.

Waveform Conditions. The waveforms shown were obtained with a 7854 Oscilloscope system. Any test oscilloscope system with 10MΩ impedance, at least 60 MHz bandwidth and 10X probe may be used. (Tektronix 7603 Oscilloscope, 7880 Time Base, 7A26 Dual Trace Amplifier and P6063A Probe). The 7B80 Time Base was triggered on the input signal. A logic analyzer (Tektronix WR501) with P6451 Probe and test leads was used for waveforms 6 and 7 only.

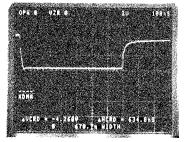

Waveforms 6 and 7 Conditions.

The 7B80 Time Base was triggered by the WR501 Logic Analyzer trigger output. The WR501 inputs were connected as follows (see Table 7-1 below):

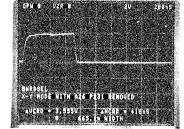

| TABLE 7-1         Setup For Waveforms 6, 7, 27 and 28 |              |             |  |  |  |  |  |

A-Y & Y I WOOD Timing Diagrams

\* All display related signal further assumes that the is LO and ZON is HI), XY timing diagram for the [

\* All display related signals are not shown on this timing diagram. In X-Y mode, DSY is HI, XY is HI and CHR is LO. This timing diagram further assumes that the Real Time mode bit (RT) is LO (and thus DSYON is HI, RTMOFF is HI, <u>DSYOFF</u> is HI, XYINH is HI, <u>RTMZOFF</u> is LO and ZON is HI). XY is HI and CHR is LO (resulting in both WS1 and WS2 being LO). Refer to the first 3 sections of the Y-T MODE timing diagram for the Display Mode Word, Horizontal and Vertical setup sequences.

Figure 7-44. X-Y Mode Timing Diagram.

#### WAVEFORM CONDITIONS

The waveforms shown were obtained with the 7854 controls set as follows: CRT DISPLAY (STORED): VERTICAL MODE (LEFT); HORIZONTAL MODE (B); READOUT (OFF; for Y-T Mode and X-Y Mode; ON for Character Mode). Refer to the waveform photos for additional setup information. No plug-in units were installed in the 7854.

**Waveform Conditions.** The waveforms shown were obtained with a 7854 Oscilloscope system. Any test oscilloscope system with  $10M\Omega$  impedance, at least 60 MHz bandwidth and 10X probe may be used. (Tektronix 7603 Oscilloscope, 7B80 Time Base, 7A26 Dual Trace Amplifier and P6063A Probe). The 7B80 Time Base was triggered on the input signal. A logic analyzer (Tektronix WR501) with P6451 Probe and test leads was used for waveforms 25, 27, 28, 30, 37, 41 and 42 only.

Setup A: Waveform 18 conditions. The 7B80 Time Base was triggered on 5 kHz Φ1.

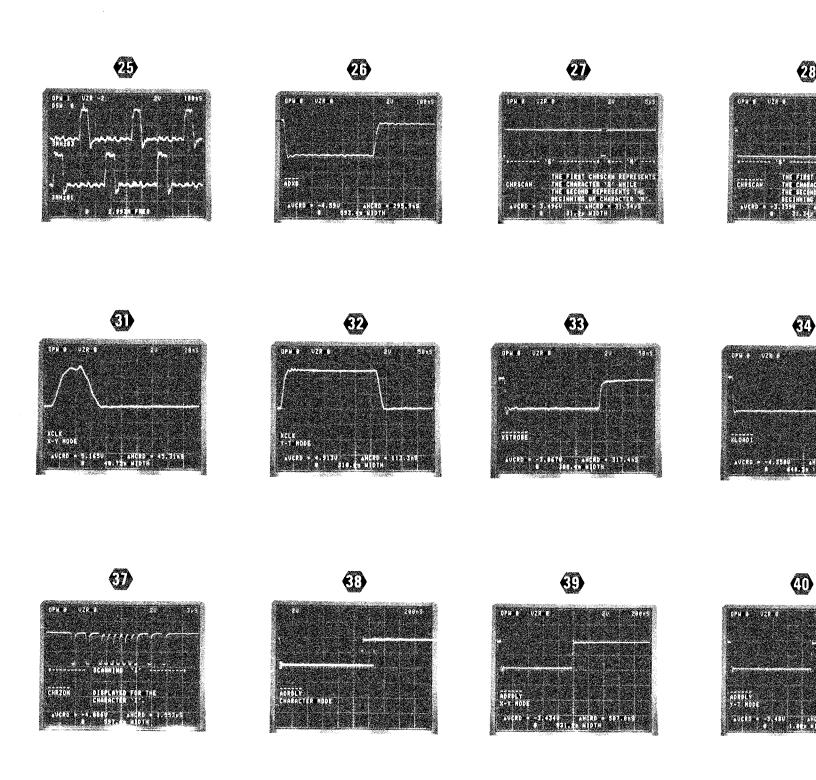

Setup B: Waveform 25 conditions. The 7B80 Time Base was triggered on 3 MHz Φ1.

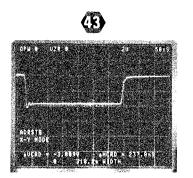

Setup C: Waveforms 27 and 28 conditions. The 7B80 Time Base was triggered by the WR501 Logic Analyzer trigger output. The WR501 inputs were connected and corresponding switches set as follows (see Table 7-2 below):

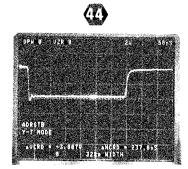

Setup D: Waveforms 30, 35, 37, 41 and 42 conditions. Same as setup C except as follows (see Table 7-1 below):

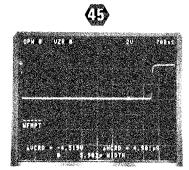

| TABLE 7-1           Setup For Waveforms 6, 7, 27 and 28 |              |             |  |  |

## AUX. REGULATOR DIAGRAM 38

## VOLTAGE AND WAVEFORM CONDITIONS

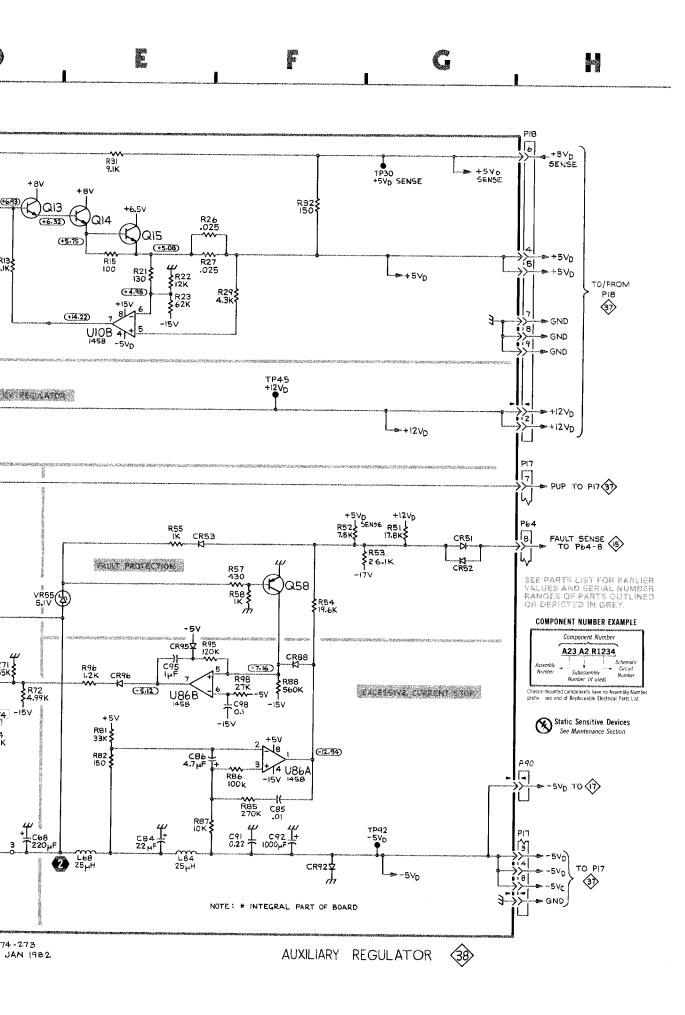

The voltages and waveforms shown were obtained with the 7854 front panel switches set as follows: CRT DISPLAY (SCOPE); TRIGGER SOURCE (VERT MODE); VERTICAL MODE (LEFT); HORIZONTAL MODE (B); READOUT INTENSITY (OFF).

Voltage Conditions. The voltages were taken with a digital multimeter with a  $10M\Omega$  input impedance (Tektronix DM501 Digital Multimeter installed in a TM501 Power Module or Tektronix 7D13 Digital Multimeter used with a readout-equipped 7000-Series Oscilloscope.

Waveform Conditions. The waveforms shown below were obtained using a test oscilloscope system with  $10M\Omega$  input impedance, at least  $60M\Omega$  bandwidth and 10X probe (Tektronix 7603 Oscilloscope, 7B92 Time Base, 7A13 Differential Comparator and P6063A Probe).

38 Auxiliary Regulator

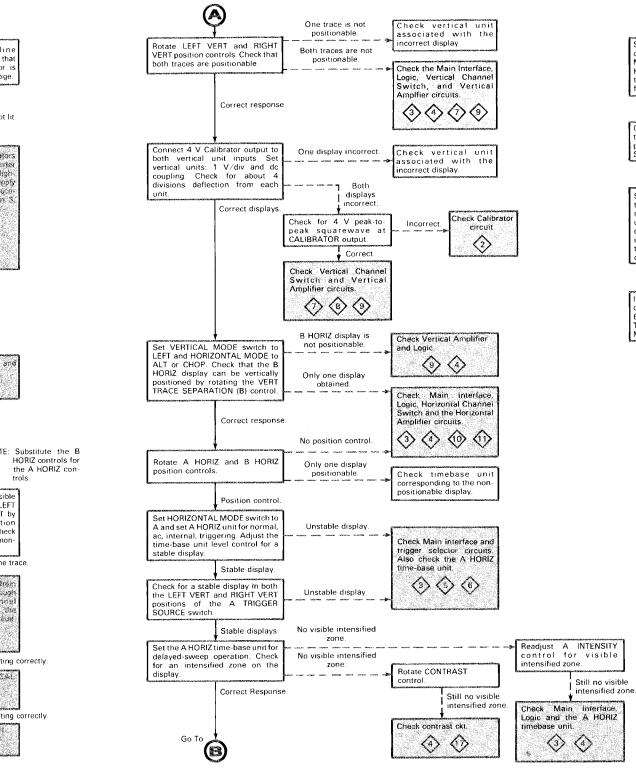

## TROUBLESHOOTING CHART INSTRUCTIONS

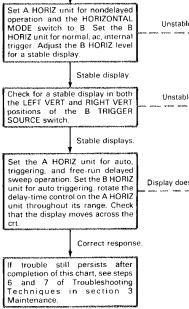

- 1. Follow the procedure for Analog Test Card (067-0912-00) installation in Section 3, Maintenance, then p with the following instructions.
- 2. Beginning at the top left block of the chart proceed downward until the 7854 does not perform as ind
- 3. Then follow the dashed lines as the symptom indicates. Each shaded block indicates a circuit which may cause of the malfunction. Refer to Section 3, Theory of Operation, for a detailed discussion of the circu Section 7, Diagrams and Circuit Board illustrations, for the circuit schematic.

## , then proceed

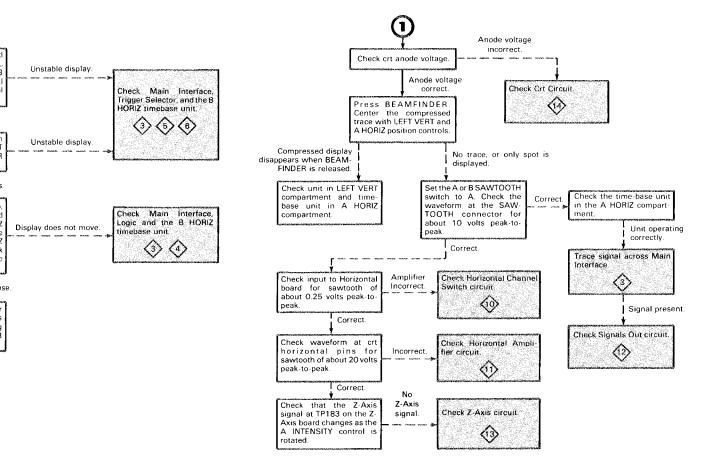

n as indicated. ch may be the the circuit, and

# REPLACEABLE **MECHANICAL PARTS**

### PARTS ORDERING INFORMATION

Replacement parts are available from or through your local Tektronix, Inc. Field Office or representative.

Changes to Tektronix instruments are sometimes made to accommodate improved components as they become available, and to give you the benefit of the latest circuit improvements developed in our engineering department. It is therefore important, when ordering parts, to include the following information in your order: Part number, instrument type or number, serial number, and modification number if applicable.

If a part you have ordered has been replaced with a new or improved part, your local Tektronix, Inc. Field Office or representative will contact you concerning any change in part number.

Change information, if any, is located at the rear of this manual.

### SPECIAL NOTES AND SYMBOLS

X000 Part first added at this serial number

Part removed after this serial number 00X

### FIGURE AND INDEX NUMBERS

Items in this section are referenced by figure and index numbers to the illustrations.

#### INDENTATION SYSTEM

This mechanical parts list is indented to indicate item relationships. Following is an example of the indentation system used in the description column.

1 2 3 4 5

Name & Description

Assembly and/or Component Attaching parts for Assembly and/or Component . . . \* . . .

Detail Part of Assembly and/or Component Attaching parts for Detail Part ---\*---

Parts of Detail Part Attaching parts for Parts of Detail Part ---\*---

Attaching Parts always appear in the same indentation as the item it mounts, while the detail parts are indented to the right. Indented items are part of, and included with, the next higher indentation. The separation symbol - - - \* - - - indicates the end of attaching parts.

Attaching parts must be purchased separately, unless otherwise specified.

### **ITEM NAME**

In the Parts List, an Item Name is separated from the description by a colon (:). Because of space limitations, an Item Name may sometimes appear as incomplete. For further Item Name identification, the U.S. Federal Cataloging Handbook H6-1 can be utilized where possible.

## INSTRUCTIONS FOR COMPLETING THE SOFTWARE/FIRMWARE PERFORMANCE REPORT

Please type or print clearly. Use a separate Software/Firmware Performance Report (SFPR) for each problem.

### II. SECTION A

1.

Fill in the serial number of the instrument, and the diagnostic version, which is located on a label on the rear panel. Press the ID key on the 7854 and copy the entire line of Version information, beginning with TEK/7854.

#### III. SECTION B

Use the complete company mailing address. Include the name and phone number of the person reporting the error. Also, be sure to fill in the name of the person submitting the SFPR.

#### IV. SECTION C

Check the reason for report and whether the error is reproducible. We cannot fix a problem when we cannot reproduce the error condition.

### V. SECTION D

Give a complete description of the system configuration on which the problem occurred. Include related peripherals, interfaces, options, special switch and/or strap settings and operating system.

### VI. SECTION E

Describe the problem completely. Include any information which might help in evaluating the error with the SFPR. If you have determined a procedure to avoid the error condition, please include this procedure. If this problem prevents you from accomplishing any useful work with the product, please state this fact. Be sure to include with the SFPR any information (programs, listings, hard copies, etc.) which will help us duplicate your problem.

### VII. SECTION F

This section is for use by Tektronix Lab Scopes Software Maintenance personnel. DO NOT WRITE IN THIS SPACE.

VIII. Mail all copies of the Software/Firmware Performance Report to:

The second se

and the second

At Tektronix, we continually strive to keep up with latest electronic developments by adding circuit and component improvements to our instruments as soon as they are developed and tested.

Sometimes, due to printing and shipping requirements, we can't get these changes immediately into printed manuals. Hence, your manual may contain new change information on following pages.

A single change may affect several sections. Since the change information sheets are carried in the manual until all changes are permanently entered, some duplication may occur. If no such change pages appear following this page, your manual is correct as printed.

# **REPLACEABLE ELECTRICAL PARTS LIST CHANGES**

#### CHANGE TO:

| 7854<br>A20  | 670-5841-07 | CKT BOARD ASSY: HIGH VOLTAGE |
|--------------|-------------|------------------------------|
| 7904A<br>A20 | 670-5841-21 | KT BOARD ASSY: HIGH VOLTAGE  |

## **DIAGRAM CHANGES**

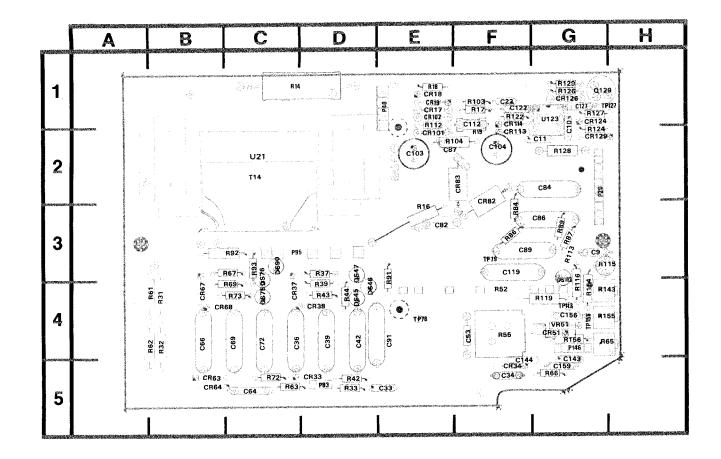

#### 7854

Add the following diagram and parts locator table to the Assemblies A21 & A20 diagram page. Figure 7-18a, A20-High Voltage circuit board assembly, and its parts locator table now apply to SN B042532 through B073998. Schematic locations remain the same.

#### 7904A

Add the following diagram and parts locator table to the Assembly A20 diagram page. Figure 8-17, A20-High Voltage circuit board assembly, and its parts locator table now apply to SN B021129 and below. Schematic locations remain the same.

### DESCRIPTION

## **DIAGRAM CHANGES**

## Assemblies A36 & A37

### Figure 7-27. A36-Calculator Keyboard circuit board assembly.

Change Figure 7-27 to A36-Calculator Electronics circuit board assembly.

Change U220 to U202 (location B2).

### PARTIAL A36 ASSY parts locator table.

Change U220A, U220B, U220D, U220E, and U220F to U202A, U202B, U202D, U202E, and U202F.

# 19 Calculator Keyboard

Change U220A to U202A (location G2).

Change U220B to U202B (location H1).

Change U220D to U202D (location B3).

Change U220E to U202E (location B2).

Change U220F to U202F (location B4).

Change A36 from CALCULATOR KEYBOARD BOARD to CALCULATOR ELECTRONICS BOARD (location G5).
