

Addendum to 68HC912BD32 Technical Data

This addendum provides changes to the 68HC912BD32 Advance Information Technical Data Book (Motorola document order number MC68HC912BD32/D Rev. 1.0).

SPI Data Register (SP0DR) Reset Value

On page 163, there is a discrepancy in the definition of the effect of reset on the SP0DR register. The reset values in the register diagram should be ignored as this register is unaffected by reset.

SP0DR — SPI Data Register

\$00D5

Bit 7	6	5	4	3	2	1	Bit 0
Bit 7	6	5	4	3	2	1	Bit 0

Wait I_{DD} in Single-Chip Mode at 10MHz

The wait I_{DD} limit in single-chip mode at 10MHz has been changed from 6mA to 8mA. This applies to Table 68 on page 258.

Table 68 Supply Current

V_{DD} = 5.0 Vdc ±5%, V_{SS} = 0 Vdc, T_A = T_L to T_H, unless otherwise noted

Characteristic	Symbol	8 MHz Typical	4 MHz	8 MHz	10 MHz	Unit
WAIT: (All peripheral functions shut down) Single-chip mode	W _{IDD}		3	5	8	mA

Information in this document is provided solely to enable system and software implementers to use Freescale Semiconductor products. There are no express or implied copyright licenses granted hereunder to design or fabricate any integrated circuits or integrated circuits based on the information in this document. Freescale Semiconductor reserves the right to make changes without further notice to any products herein. Freescale Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does Freescale Semiconductor assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation consequential or incidental damages. "Typical" parameters which may be provided in Freescale Semiconductor data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. Freescale Semiconductor does not convey any license under its patent rights nor the rights of others. Freescale Semiconductor products are not designed, intended, or authorized for use as components in systems intended for surgical implant into the body, or other applications intended to support or sustain life, or for any other application in which the failure of the Freescale Semiconductor product could create a situation where personal injury or death may occur. Should Buyer purchase or use Freescale Semiconductor products for any such unintended or unauthorized application, Buyer shall indemnify and hold Freescale Semiconductor and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that Freescale Semiconductor was negligent regarding the design or manufacture of the part.
